EXP NO: 1

AZURE DEVOPS ENVIRONMENT SETUP

Aim:

To set up and access the Azure DevOps environment by creating an organization through the Azure portal.

INSTALLATION

1. Open your web browser and go to the Azure website: <https://azure.microsoft.com/en-us/get-started/azure-portal>.

Sign in using your Microsoft account credentials.

If you don't have a Microsoft account, you can create one here: <https://signup.live.com/?lic=1>

2. Azure home page

The screenshot shows the Microsoft Azure home page. At the top, there's a search bar and a Copilot button. Below the header, the "Azure services" section features a "Create a resource" button and icons for Azure DevOps organizations, Subscriptions, Dashboard hub, Resource groups, Azure Load Testing, Quickstart Center, Azure AI services, Kubernetes services, and More services. The "Resources" section displays recent resources: "Music" (Azure Load Testing) and "Music_playlist_Batch_Creator" (Resource group), both last viewed 3 days ago. The "Navigate" section includes links for Subscriptions, Resource groups, All resources, and Dashboard. The "Tools" section lists Microsoft Learn, Azure Monitor, Microsoft Defender for Cloud, and Cost Management. The "Useful links" section includes a link to the Azure mobile app.

3. Open DevOps environment in the Azure platform by typing **Azure DevOps Organizations** in the search bar.

The screenshot shows the Microsoft Azure home page with a search bar containing "DevOps". The search results are displayed under the "Services" tab, showing items like Azure Native New Relic Service, Managed DevOps Pools, Azure DevOps organizations, and Azure Native Dynatrace Service. The "Marketplace" tab shows Static Web App, Rocky Linux 9, Build Agents for Azure DevOps, and InfluxDB Cloud (Official Version). The "Documentation" section includes links to DevOps architecture design, Secure your Azure DevOps, Course AZ-400T00-A, and Managed DevOps Pools Overview. The "Tools" section includes Microsoft Entra ID, Azure DevOps, and Cost Management. The "Useful links" section includes a link to the Azure mobile app.

4. Click on the **My Azure DevOps Organization** link and create an organization and you should be taken to the Azure DevOps Organization Home page.

Result:

Successfully accessed the Azure DevOps environment and created a new organization through the Azure portal.

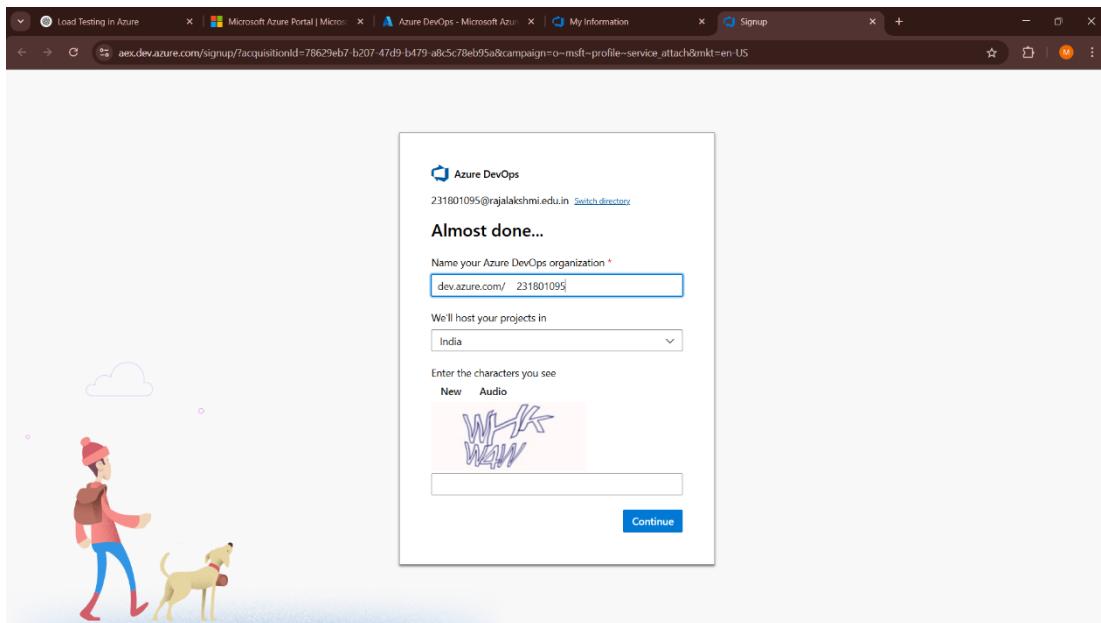

EXP NO: 2

AZURE DEVOPS PROJECT SETUP AND USER STORY MANAGEMENT

Aim:

To set up an Azure DevOps project for efficient collaboration and agile work management.

1.Create An Azure Account

2.Create the First Project in Your Organization

a. After the organization is set up, you'll need to create your first **project**. This is where you'll begin to manage code, pipelines, work items, and more.

b. On the organization's **Home page**, click on the **New Project** button.

c. Enter the project name, description, and visibility options:

Name: Choose a name for the project (e.g., **LMS**).

Description: Optionally, add a description to provide more context about the project.

Visibility: Choose whether you want the project to be **Private** (accessible only to those invited) or **Public** (accessible to anyone).

d. Once you've filled out the details, click **Create** to set up your first project.

Create new project

Project name *

Description

Visibility

Public

Anyone on the internet can view the project. Certain features like TFVC are not supported.

Private

Only people you give access to will be able to view this project.

By creating this project, you agree to the Azure DevOps [code of conduct](#)

Advanced

Version control [?](#)

Git

Work item process [?](#)

231801095 Agile

Cancel Create

The screenshot shows the 'Create new project' dialog box. At the top, it says 'Create new project'. Below that is a 'Project name *' field containing 'Music Playlist Batch Creator'. There is a 'Description' field which is empty. Under 'Visibility', there are two options: 'Public' (selected) and 'Private'. The 'Public' option is described as allowing anyone on the internet to view the project, noting that certain features like TFVC are not supported. The 'Private' option is described as allowing only people given access to view the project. Below this, a note states 'By creating this project, you agree to the Azure DevOps [code of conduct](#)'. There is an 'Advanced' button with a dropdown arrow. At the bottom, there are 'Version control' and 'Work item process' dropdowns, both set to 'Git' and '231801095 Agile' respectively. Finally, there are 'Cancel' and 'Create' buttons at the bottom right.

3. Once logged in, ensure you are in the correct organization. If you're part of multiple organizations, you can switch between them from the top left corner (next to your user profile). Click on the Organization name, and you should be taken to the Azure DevOps Organization Home page.

The screenshot shows the Azure DevOps Organizations dashboard. At the top right, there's a sign-out link for 'Karthick S'. On the left, there's a profile card for 'Karthick S' with a red circular icon containing 'KS'. Below the profile, it lists contact information: email '231801079@rajalakshmi.edu.in', website 'rajalakshmi.edu.in', location 'India', and email '231801079@rajalakshmi.edu.in'. A 'Visual Studio Dev Essentials' section is present with a brief description and a 'Use your benefits' button. To the right, the main dashboard shows 'Azure DevOps Organizations' with a 'Create new organization' button. It lists a single project: 'Music Playlist Batch Creator'. An 'Actions' menu for this project includes options like 'Open in Visual Studio', 'Manage security', 'Browse extensions', and 'Leave'. There are also two small circular icons at the bottom right.

4. Project dashboard

The screenshot shows the Azure DevOps Project dashboard for 'Music Playlist Batch Creator'. The left sidebar contains navigation links: Overview, Summary, Dashboards, Wiki, Boards, Repos, Pipelines, Test Plans, and Artifacts. The main content area has a title 'Music Playlist Batch Creator'. It features sections for 'About this project' (describing the tool's purpose and key features), 'Project stats' (showing 1 work item and 0 work items), and 'Members' (listing five team members with their icons). The 'About this project' section includes details about bulk playlist creation, tagging & filtering, export & sharing, user-friendly interface, playlist editing, and search functionality. The 'Project stats' section shows boards, work items, and a timeline for the last 7 days. The 'Members' section shows the team's profile pictures.

5. To manage user stories:

a. From the **left-hand navigation menu**, click on **Boards**. This will take you to the main **Boards** page, where you can manage work items, backlogs, and sprints.

b. On the **work items** page, you'll see the option to **Add a work item** at the top. Alternatively, you can find a + button or **Add New Work Item** depending on the view you're in. From the **Add a work item** dropdown, select **User Story**. This will open a form to enter details for the new User Story.

The screenshot shows the Azure DevOps Boards page. The left sidebar is titled 'Music Playlist Batch Cr...' and includes sections for Overview, Boards, Backlogs, Sprints, Queries, Delivery Plans, Analytics views, Repos, Pipelines, Test Plans, and Artifacts. The main area is titled 'Backlog' and shows a table with the following data:

Order	Work Item Type	Title	State	Effort	Story Points	Business Value	Value Area	Tags
1	Epic	> User Authentication & Profile Management	New				Business	
2	Epic	> Develop a system that allows users to create and manage m...	New				Business	
3	Epic	> Fetch and integrate music data from external sources for pl...	New				Business	
4	Epic	> Enable users to edit, customize, and share their playlists wit...	New				Business	
5	Epic	> Improve system performance and enhance user experience	New				Business	
6	Epic	> Test Epic	New				Business	

The screenshot shows the Azure DevOps work items page. The top navigation bar includes a search bar, a star icon, a refresh icon, a user icon (KS), and a more options icon. The main area shows a backlog with a 'New Work Item' button. A user profile overlay is displayed for 'Karthick S' (231801079@rajalakshmi.edu.in). The profile includes a red circular icon with 'KS', a 'View account' link, and a 'Switch directory' link. Below the profile, there are three 'Business' status indicators. A sign-in prompt 'Sign in with a different account' is also visible.

Result:

Successfully created an Azure DevOps project with user story management and agile workflow setup.

EXP NO: 3

SETTING UP EPICS, FEATURES, AND USER STORIES FOR PROJECT PLANNING

Aim:

To learn about how to create epics, user story, features, backlogs for your assigned project.

Create Epic, Features, User Stories, Task

The screenshot shows the Azure DevOps interface for a project titled "Music Playlist Batch Creator Team". The left sidebar is open, showing options like Overview, Boards, Work items, and Backlogs. The main area displays a backlog of work items. The first item is an Epic: "User Authentication & Profile Management". Below it is another Epic: "Develop a system that allows users to create and manage multiple playlists in batches". This Epic has two child Features: "Auto-Playlist Creation Based on user preference" and "As a user, I should be able to create playlists based on...". There are also several other Epics and Features listed, such as "Bulk Song Addition", "Data Collection", "Fetch and Integrate music data from external sources for pl...", "Enable users to edit, customize, and share their playlists wit...", "Improve system performance and enhance user experience", and "Test Epic". The backlog table includes columns for Order, Work Item Type, Title, State, Effort, Story Points, Business Value, Value Area, and Tags.

1.Fill in Epics

The screenshot shows the "New Epic" dialog box. At the top, it says "NEW EPIC" and "Develop a system that allows users to create and manage multiple playlists in batches". Below this, there are fields for "Karthick S" (Assignee), "0 Comments", and "Add Tag". Under "Planning", there are fields for "State" (set to "New"), "Reason" (set to "New"), "Area" (set to "Music Playlist Batch Creator"), and "Iteration" (set to "Music Playlist Batch Creator/Model"). The "Deployment" section contains a note: "To track releases associated with this work item, go to Releases and turn on deployment status reporting for Boards in your pipeline's Options menu. Learn more about development status reporting." The "Development" section includes fields for "Priority" (set to "2"), "Risk", "Effort", "Business Value", "Time Criticality", "Start Date" (with a placeholder "Select a date..."), "Target Date" (with a placeholder "Select a date..."), and "Add link" (with a note about linking to Azure Repos). The "Related Work" section includes a field for "Classification" (set to "Value area: Business") and a note: "Add an existing work item as a parent".

2.Fill in Features

The screenshot shows the 'Details' view of a work item titled 'FEATURE 26'. The work item ID is 26, assigned to Karthick S, and is currently 'New'. It is categorized under 'Music Playlist Batch Creator' and 'Music Playlist Batch Creator\Model'. The 'Description' section contains the text: 'Auto-Playlist Creation Based on user preference'. The 'Planning' section shows a priority of 2. The 'Deployment' section includes a note about tracking releases and a link to 'Releases'. The 'Development' section provides instructions for linking to Azure Repos. The 'Related Work' section lists another work item, '25 Develop a system that allows users to creat...', which is also 'New'. The 'Classification' section indicates the value area is 'Business'.

3.Fill in User Story Details

The screenshot shows the 'Details' view of a work item titled 'USER STORY 47'. The work item ID is 47, assigned to Karthick S, and is now 'Resolved'. It is categorized under 'Music Playlist Batch Creator' and 'Music Playlist Batch Creator\Model'. The 'Description' section contains the text: 'As a user, I should be able to create playlists based on various categories (like mood, genre, artist, popularity, lyrics) as I need'. The 'Acceptance Criteria' section is empty. The 'Discussion' section contains the text: 'Auto-Playlist Creation Based on user preference'. The 'Planning' section shows story points of 3 and a priority of 2. The 'Deployment' section includes a note about tracking releases and a link to 'Releases'. The 'Development' section provides instructions for linking to Azure Repos. The 'Related Work' section lists another work item, '26 Auto-Playlist Creation Based on user prefer...', which is also 'New'. The 'Classification' section indicates the value area is 'Business'.

Result:

Thus, the creation of epics, features, user story and task has been created successfully.

EXP NO: 4

SPRINT PLANNING

Aim:

To assign user story to specific sprint for the Music Playlist Batch Creator Project.

Sprint Planning

Sprint 1

The screenshot shows the Azure DevOps interface for the 'Music Playlist Batch Creator' project. The left sidebar has 'Boards' selected. The main area is titled 'Music Playlist Batch Creator Team' and shows a 'Taskboard' view. The backlog section contains two items:

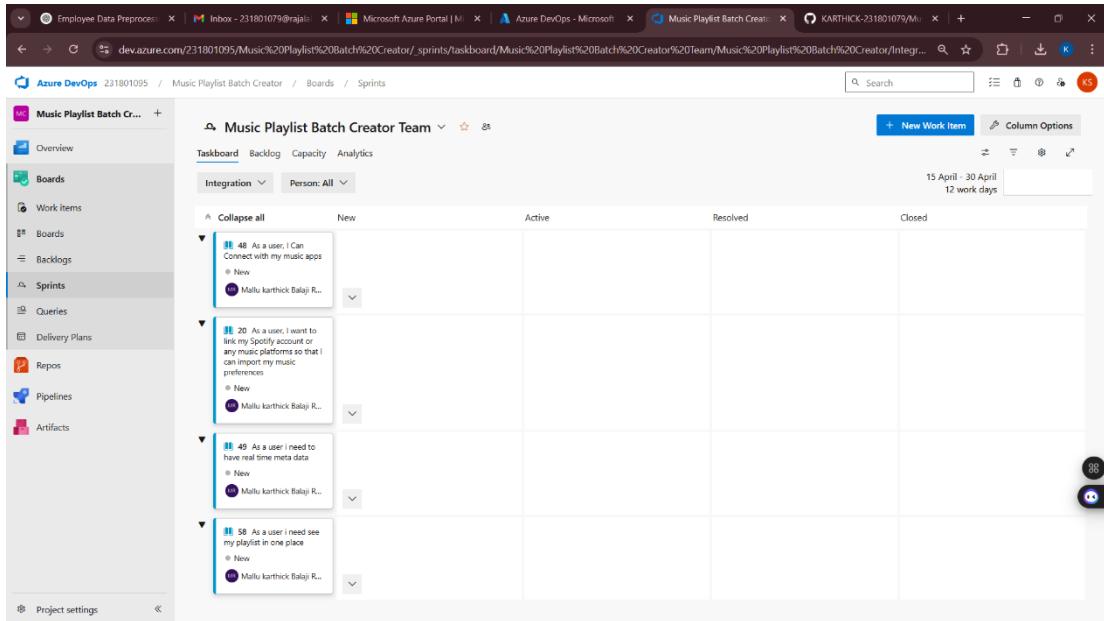

- Item 19: 'As a user, I want to sign up and log in securely so that I can access my playlists' - Status: New, Assigned to: Karthikeyan Senthil
- Item 21: 'Implement JWT-based authentication' - Status: New, Assigned to: Karthikeyan Senthil

Sprint 2

The screenshot shows the Azure DevOps interface for the 'Music Playlist Batch Creator' project. The left sidebar has 'Boards' selected. The main area is titled 'Music Playlist Batch Creator Team' and shows a 'Taskboard' view. The backlog section contains three items:

- Item 46: 'As a user I should be able to add many songs at once into my playlist' - Status: Unassigned
- Item 47: 'As a user I should be able to create audio playlist as I need' - Status: Resolved, Assigned to: Karthick S
- Item 43: 'Data needed to be collected' - Status: Resolved, Assigned to: legadeeswaran D

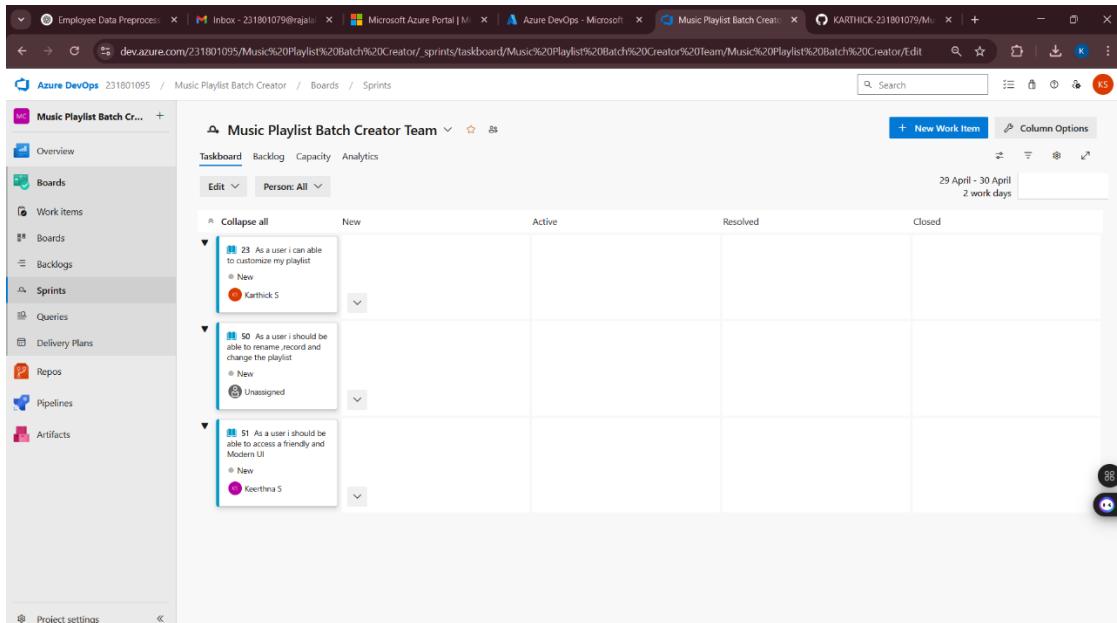

Sprint 3

A screenshot of the Azure DevOps Taskboard for the 'Music Playlist Batch Creator Team'. The board shows four columns: New, Active, Resolved, and Closed. There are four backlog items visible:

- 48 As a user, I can Connect with my music apps (New, assigned to Mallu karthick Balaji R.)
- 20 As a user, I want to link my Spotify account or any music platforms so that I can import my music preferences (New, assigned to Mallu karthick Balaji R.)
- 49 As a user i need to have real time meta data (New, assigned to Mallu karthick Balaji R.)
- 58 As a user i need see my playlist in one place (New, assigned to Mallu karthick Balaji R.)

Sprint 4

A screenshot of the Azure DevOps Taskboard for the 'Music Playlist Batch Creator Team'. The board shows four columns: New, Active, Resolved, and Closed. There are three backlog items visible:

- 23 As a user i can able to customize my playlist (New, assigned to Karthick S.)
- 50 As a user i should be able to rename, record and change the playlist (New, Unassigned)
- 51 As a user i should be able to access a friendly and Modern UI (New, assigned to Keethra S.)

Result:

The Sprints are created for the Music Playlist Batch Creator Project.

EXP NO: 5

POKER ESTIMATION

Aim:

Create Poker Estimation for the user stories - Music Playlist Batch Creator Project.

Poker Estimation

The screenshot shows a Microsoft Azure DevOps User Story card for item 47. The card has the following details:

- User Story:** 47 As a user i should be able to create audio playlist as i need
- Assignee:** Karthick S
- Comments:** 0
- Add Tag:** Add Tag
- Status:** Resolved
- Area:** Music Playlist Batch Creator
- Reason:** Code complete and unit b
- Iteration:** Music Playlist Batch Creator/Model
- Story Points:** 3
- Priority:** 2
- Risk:** 0
- Deployment:** To track releases associated with this work item, go to [Releases](#) and turn on deployment status reporting for Boards in your pipeline's Options menu. [Learn more about deployment status reporting](#).
- Development:** Add link. Link an Azure Repos [commit](#), [pull request](#) or [branch](#) to see the status of your development. You can also [create a branch](#) to get started.
- Classification:** Value area: Business
- Discussion:** Add a comment. Use # to link a work item, @ to mention a person, or ! to link a pull request. [switch to Markdown editor](#)
- Related Work:** Add link. Parent: 26 Auto-Playlist Creation Based on user preference. Updated Feb 18. New.

Result:

The Estimation/Story Points is created for the project using Poker Estimation.

EXP NO: 6

DESIGNING CLASS AND SEQUENCE DIAGRAMS FOR PROJECT ARCHITECTURE

Aim:

To Design a Class Diagram and Sequence Diagram for the given Project.

6A. Class Diagram

6B. Sequence Diagram

Result:

The Class Diagram and Sequence Diagram is designed Successfully for the Music Playlist Batch Creator.

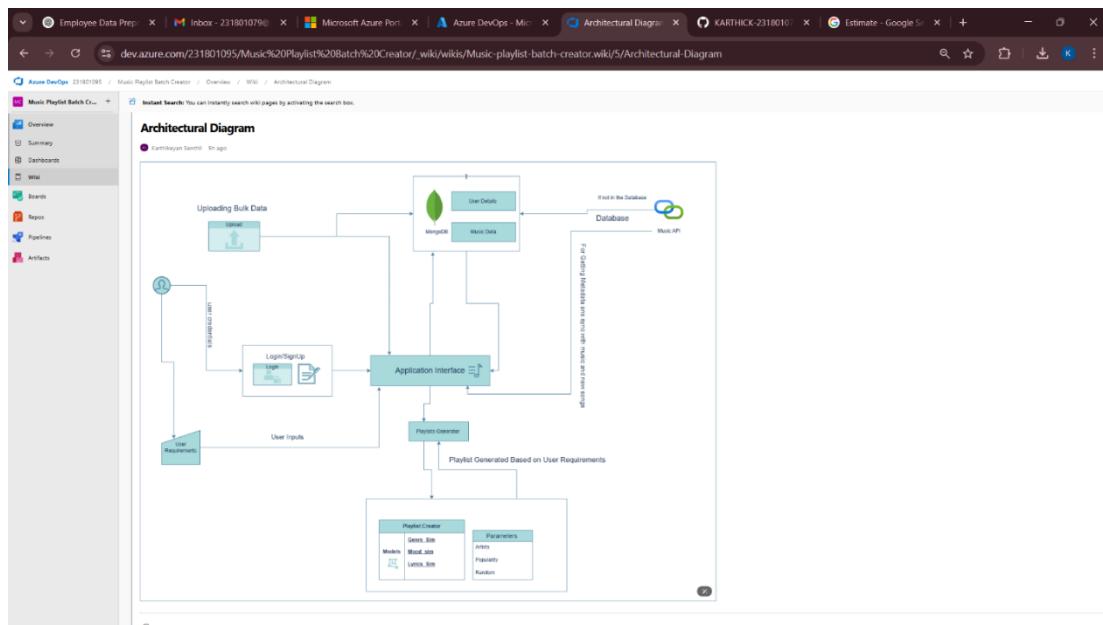

EXP NO: 7

DESIGNING ARCHITECTURAL AND ER DIAGRAMS FOR PROJECT STRUCTURE

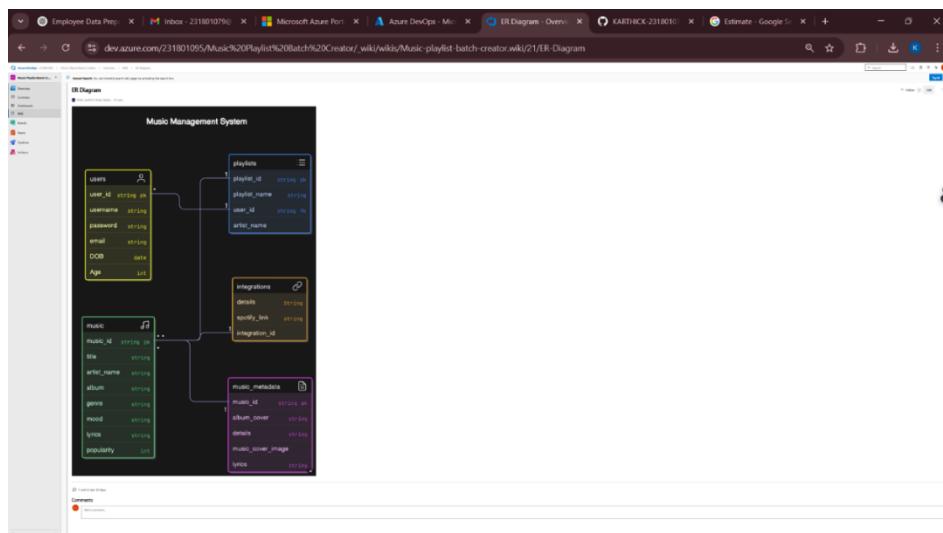

Aim:

To Design an Architectural Diagram and ER Diagram for the given Project.

7A. Architectural Diagram

7B. ER Diagram

Result:

The Architecture Diagram and ER Diagram is designed Successfully for the Music Playlist Batch Creator

EXP NO: 8	TESTING – TEST PLANS AND TEST CASES
------------------	--

Aim:

Test Plans and Test Case and write two test cases for at least five user stories showcasing the happy path and error scenarios in azure DevOps platform.

Test Planning and Test Case**Test Case Design Procedure****1. Understand Core Features of the Application**

- User Signup & Login
- Viewing and Managing Playlists
- Fetching Real-time Metadata
- Editing playlists (rename, reorder, record)
- Creating smart audio playlists based on categories (mood, genre, artist, etc.)

2. Define User Interactions

- Each test case simulates a real user behaviour (e.g., logging in, renaming a playlist, adding a song).

3. Design Happy Path Test Cases

- Focused on validating that all features function as expected under normal conditions.
- Example: User logs in successfully, adds item to playlist, or creates a category-based playlist.

4. Design Error Path Test Cases

- Simulate negative or unexpected scenarios to test robustness and error handling.
- Example: Login fails with invalid credentials, save fails when offline, no recommendations found.

5. Break Down Steps and Expected Results

- Each test case contains step-by-step actions and a corresponding expected outcome.
- Ensures clarity for both testers and automation scripts.

6. Use Clear Naming and IDs

- Test cases are named clearly (e.g., TC01 – Successful Login, TC10 – Save Playlist Fails).
- Helps in quick identification and linking to user stories or features.

7. Separate Test Suites

- Grouped test cases based on functionality (e.g., Login, Playlist Editing, Recommendation System).

- Improves organization and test execution flow in Azure DevOps.

8. Prioritize and Review

- Critical user actions are marked high-priority.
- Reviewed for completeness and traceability against feature requirements.

1. New test plan

New Test Plan

Name: Music Playlist Batch Creator - Test Plan

Area Path: Music Playlist Batch Creator

Iteration: Music Playlist Batch Creator|Integration

Create Cancel

2. Test suite

Title	Order	Test Case Id	Assigned To	State
TC01 - Successful Sign Up	1	78	Karthikeyan Se... Design	
Forgot Email	2	80	Karthikeyan Se... Design	
Requirement based suite	3	81	Karthikeyan Se... Design	
Query based suite	4	82	Karthikeyan Se... Design	

3.Test case

Give two test cases for at least five user stories showcasing the happy path and error scenarios in azure DevOps platform.

Music Playlist Batch Creator – Test Plans

USER STORIES

- As a user, I want to sign up and log in securely so that I can access my playlists (ID: 79).
- As a user, I need to see my playlist in one place (ID: 76).
- As a user, I should be able to create an audio playlist as needed (ID: 73).
- As a user, I should be able to rename, record, and change the playlist (ID: 68).
- As a user, I need to have real-time metadata (ID: 65).

Test Suites

Test Suit: TS01 - User Login (ID: 86)

1. TC01 – Successful Sign Up

- **Action:**
 - Go to the Sign-Up page.
 - Enter valid name, email, and password.
 - Click "Sign Up".
- **Expected Results:**
 - Sign-Up form is displayed.
 - Fields accept values without error.
 - Account is created, and the user is redirected to the dashboard.
- **Type:** Happy Path

2. TC02 – Secure Login

- **Action:**
 - Go to the Login page.
 - Enter valid email and password.
 - Click on "Login".
- **Expected Results:**
 - Login form is displayed.
 - Fields accept data without error.
 - User is logged in and redirected to the dashboard.
- **Type:** Happy Path

3. TC03 – Sign Up with Existing Email

- **Action:**
 - Go to the Sign-Up page.
 - Enter a name and an already registered email.
 - Click on "Sign Up".
- **Expected Results:**

- Fields accept data.
 - Error message "Email already registered" is displayed.
- **Type:** Error Path

4. TC04 – Login with Wrong Password

- **Action:**
 - Go to the Login page.
 - Enter valid email and incorrect password.
 - Click on "Login".
- **Expected Results:**
 - Input is accepted.
 - Error message "Invalid username or password" is shown.
- **Type:** Error Path

Test Suit: TS02 - View Playlists (ID: 87)

1. TC05 – View Playlist Page

- **Action:**
 - Log in successfully.
 - Navigate to "My Playlists" section.
- **Expected Results:**
 - All created playlists are displayed clearly.
- **Type:** Happy Path

2. TC06 – Playlist Loading Failure

- **Action:**
 - Disconnect from the internet.
 - Navigate to "My Playlists".
- **Expected Results:**
 - Network is offline.
 - Error message "Unable to load playlists" is shown.
- **Type:** Error Path

Test Suit: TS03 - Real-Time Metadata (ID: 88)

1. TC07 – Real-Time Metadata Display

- **Action:**
 - Play a song.
 - Observe the metadata panel.
- **Expected Results:**
 - Metadata (title, artist, album, duration) is displayed and updates in real time.
- **Type:** Happy Path

2. TC08 – Metadata Not Updating

- **Action:**

- Play a different song.
 - Observe the metadata panel.
- **Expected Results:**
 - Metadata remains static or shows default/fallback message.
- **Type:** Error Path

Test Suit: TS04 - Playlist Editing (ID: 89)

1. TC09 – Rename Playlist Successfully

- **Action:**
 - Navigate to "My Playlists".
 - Click "Rename" next to a playlist.
 - Enter a new name and click "Save".
- **Expected Results:**
 - Playlist name updates successfully.
- **Type:** Happy Path

2. TC10 – Rename with Blank Name

- **Action:**
 - Click "Rename" on a playlist.
 - Leave the field blank.
 - Click "Save".
- **Expected Results:**
 - Error message "Playlist name cannot be empty" is shown.
- **Type:** Error Path

3. TC11 – Change Playlist Order

- **Action:**
 - Open a playlist.
 - Drag and drop songs to reorder.
 - Click "Save".
- **Expected Results:**
 - Playlist order is updated and saved.
- **Type:** Happy Path

4. TC12 – Change Playlist Order Fails

- **Action:**
 - Login and go to "My Playlists".
 - Select a playlist.
 - Go offline or simulate server error.
 - Reorder songs and click "Save Order".
- **Expected Results:**
 - Error message: "Failed to update order. Please check your connection".
- **Type:** Error Path

Test Suit: TS05 - Smart Playlist Creation (ID: 90)

1. TC13 – Generate Playlist Based on Various Categories

- Action:

- Login with valid credentials.
- Click on "Generate Playlist".
- Select categories.
- Click "Generate Playlist".

- Expected Results:

- Playlist is generated based on selected mood and categories.

- Type: Happy Path

2. TC14 – Fail to Generate Playlist Due to Missing Category Selection or Invalid Input

- Action:

- Login with valid credentials.
- Click on "Generate Playlist".
- Select categories.
- Click "Generate Playlist".

- Expected Results:

- Error message: "Please select at least one valid category" or "No recommendations found for the selected filters".

- Type: Error Path

Test Cases

The screenshot shows the Microsoft Azure DevOps Test Plan interface. A test case titled "77 TC06 – Playlist Loading Failure" is displayed. The test case details include:

- Owner: Karthick S
- Status: Design
- Area: Music Playlist Batch Creator
- Reason: New
- Iteration: Music Playlist Batch Creator/Integration

The "Steps" section contains two steps:

Step	Action	Expected result	Attachments
1.	Disconnect from internet	Network is offline	
2.	Navigate to "My Playlists"	Error message "Unable to load playlists" is shown	

The "Status" section indicates:

- Priority: Z
- Automation status: Not Automated

The screenshot shows the Azure DevOps Test Plan interface. A test case named 'TC05 – View Playlist Page' is selected. The test case details include:

- Owner:** Karthick S
- Comments:** 0
- Tags:** Add Tag
- Area:** Music Playlist Batch Creator
- Iteration:** Music Playlist Batch Creator\Integration
- Steps:** 2 steps defined.
- Custom:** Type: Happy Path
- Status:** Priority: 2, Automation status: Not Automated

The steps listed are:

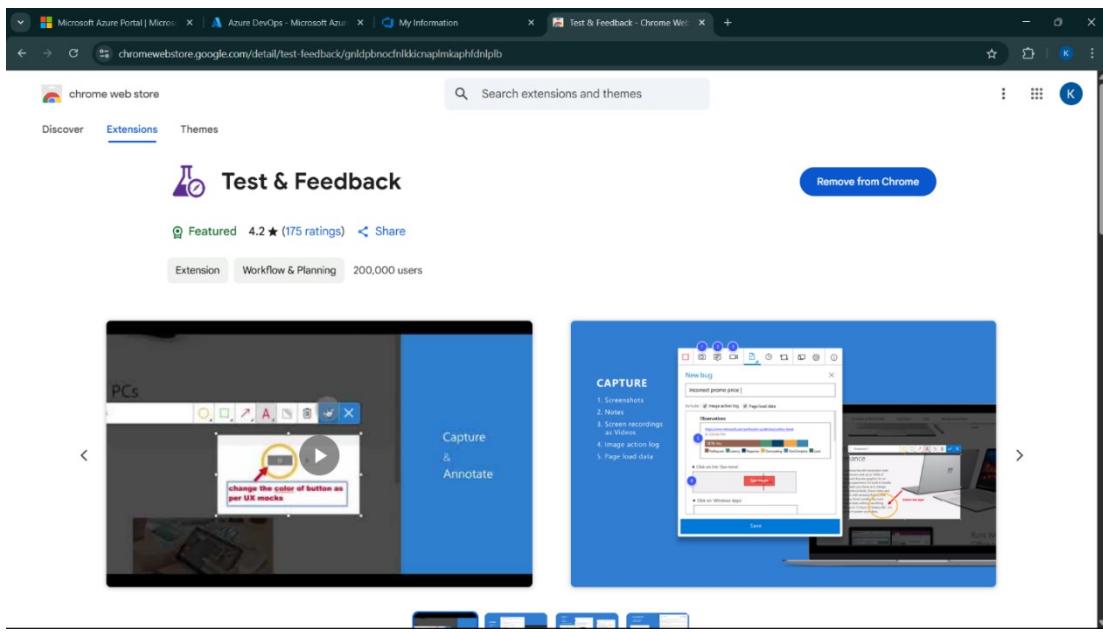

1. Log in successfully. Expected result: User is redirected to dashboard.
2. Navigate to "My Playlists" section. Expected result: All created playlists are displayed clearly.

4. Installation of test

The screenshot shows the Chrome Web Store page for the 'Test & Feedback' extension. The extension details are:

- Rating:** 4.2 stars (175 ratings)
- Category:** Workflow & Planning
- Users:** 200,000 users
- Description:** Capture & Annotate

The extension interface is shown with two main sections: 'PCs' and 'Capture & Annotate'. The 'PCs' section shows a screenshot of a user interface with annotations. The 'Capture & Annotate' section shows a screenshot of a bug reporting interface with annotations.

Test and feedback

Showing it as an extension

5. Running the test cases

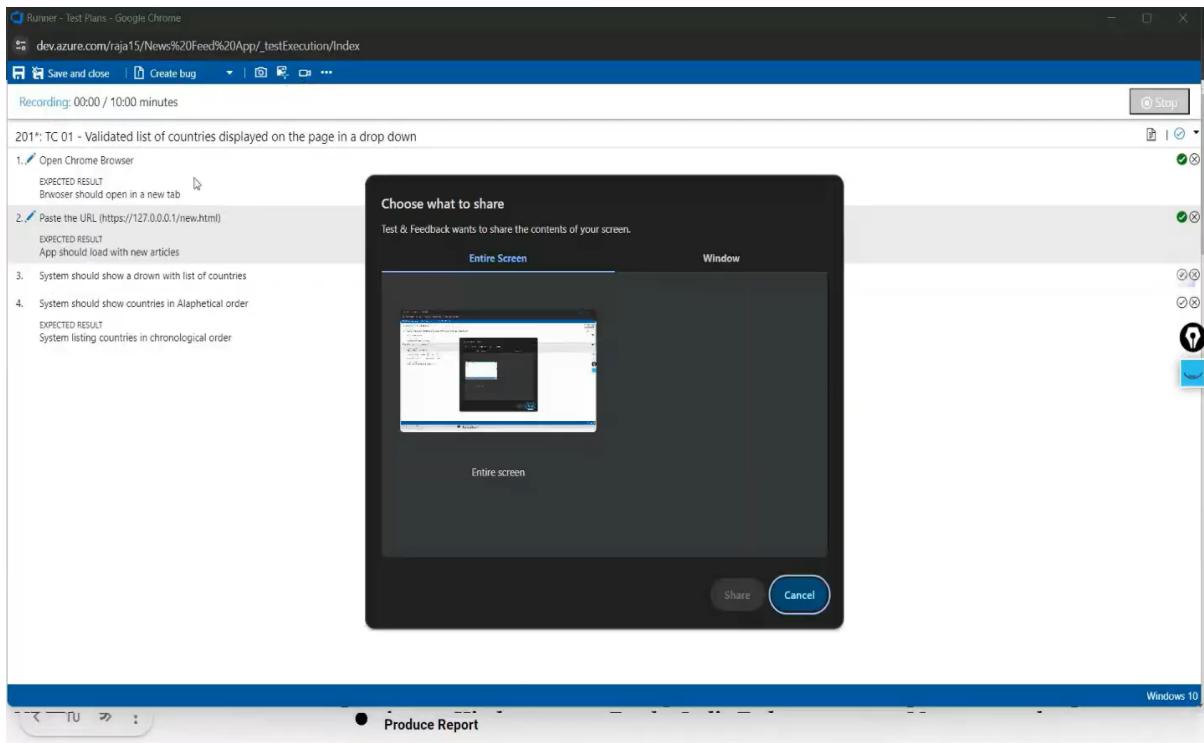

The screenshot shows the Azure DevOps Test Plans interface. On the left, there's a navigation sidebar with options like Overview, Boards, Repos, Pipelines, Test Plans, Test plans, Progress report, Parameters, Configurations, Runs, and Artifacts. The 'Test plans' section is currently selected. In the center, under 'Test Suites', there's a list of suites: 'Music Playlist Batch Creator - T...', 'TS01 - User Login (4)', 'TS02 - View Playlists (2)', 'TS03 - Real-Time Met...', 'TS04 - Playlist Editing (4)', and 'TS05 - Smart Playlist ...'. 'TS02 - View Playlists (2)' is selected. Below it, the 'Test Points (2 items)' table lists two entries:

Title	Outcome	Order	Test Case Id	Configuration	Tester
<input checked="" type="checkbox"/> TC05 – View Playlist Page	Passed	1	75	Windows 10	Malu karthick B...
<input type="checkbox"/> TC06 – Playlist Loading Failure	Passed	2	77	Windows 10	Malu karthick B...

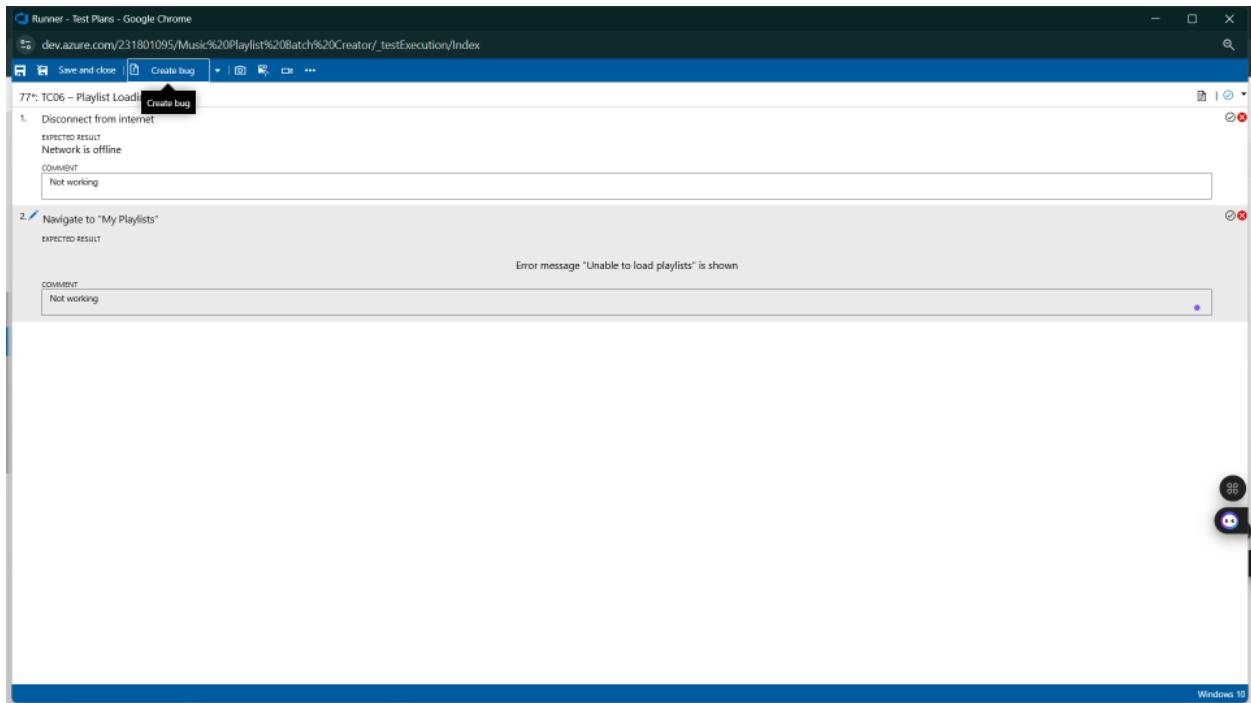

A context menu is open over the first row, showing options: View execution history, Mark Outcome (selected), Run, Reset test to active, Edit test case, Assign tester, and View test result.

The screenshot shows the 'Test Execution' page for 'TC05 – View Playlist Page'. It displays a single step: '1. Log in successfully' with a 'PASSED' result. Below it, another step is listed: '2. Navigate to "My Playlists" section' with a 'PASSED' result. The text 'All created playlists are displayed clearly' is also present.

6.Recording the test case

7.Creating the bug

The screenshot shows a bug entry in the Azure DevOps Test Plan interface. The title of the bug is "TB01 - Playlist loading spinner keeps spinning indefinitely on poor network". The bug is categorized under "Music Playlist Batch Creator" and is currently "Unassigned". The "Repro Steps" section details two failed steps: disconnecting from the internet and navigating to "My Playlists". The "Comments" section notes an error message: "Unable to load playlists" is shown. The "Test Configuration" is listed as Windows 10. The "Planning" and "Deployment" sections provide standard project management details like priority (2), severity (3 - Medium), and activity. The "Development" section includes links to Azure Repos and a branch. The "Related Work" section shows a link to another bug entry, "77 TC06 - Playlist Loading Failure". The "System Info" section lists system configuration details such as browser (Google Chrome 135), operating system (Windows NT 10.0: Win64: x64), and processor (11th Gen Intel(R) Core(TM) i3-1115G4 @ 3.00GHz). The "Discussion" section is currently empty.

This screenshot shows the same bug entry as the previous one, but with more detailed system information visible. The "System Info" table provides a comprehensive list of hardware and software specifications. The table includes columns for parameter name and value, such as "Browser - Name" (Google Chrome 135), "Memory - Available" (814784512), and "Display - Pixels per inch (X axis)" (120). The "Discussion" section also contains a placeholder comment: "Add a comment. Use # to link a work item, ! to link a pull request, or @ to mention a person." The overall layout is identical to the first screenshot, showing the bug details, planning, deployment, development, related work, and system info sections.

8. Test case results

The screenshot shows the Azure DevOps interface for a test plan. On the left, the navigation bar includes 'Overview', 'Boards', 'Repos', 'Pipelines', 'Test Plans', 'Test plans' (selected), 'Progress report', 'Parameters', 'Configurations', 'Runs', and 'Artifacts'. The 'Test plans' section shows a progress report: '100% run, 100% passed. [View report](#)'. Below this, 'Test Suites' are listed: 'TS01 - User Login (4)', 'TS02 - View Playlists (2)' (selected), 'TS03 - Real-Time Met...', 'TS04 - Playlist Editing (4)', and 'TS05 - Smart Playlist ...'. The main content area displays 'TS02 - View Playlists (ID: 87)' with tabs for 'Define', 'Execute' (selected), and 'Chart'. Under 'Test Points (2 items)', there are two entries: 'TC05 - View Playlist Page' (selected) and 'TC06 - Playlist Loading Failure'. To the right, a modal window titled 'TC05 - View Playlist Page' shows 'Test Case Results' with a table:

Outcome	TimeStamp	Configuration	Run by	Tester	Test PL
Passed	4m ago	Windows 10	Karthick S	Malu karthick Balaji ...	Music
Passed	12m ago	Windows 10	Karthick S	Malu karthick Balaji ...	Music
Not Applicable	12m ago	Windows 10	Karthick S	Malu karthick Balaji ...	Music
Passed	14m ago	Windows 10	Karthick S	Malu karthick Balaji ...	Music
Passed	Tuesday	Windows 10	Karthikyan Senthil	Malu karthick Balaji ...	Music
Passed	Saturday	Windows 10	Malu karthick Balaji ...	Malu karthick Balaji ...	Music
Failed	Saturday	Windows 10	Malu karthick Balaji ...	Malu karthick Balaji ...	Music
Passed	Apr 11	Windows 10	Karthick S	Malu karthick Balaji ...	Music
Passed	Apr 11	Windows 10	Karthick S	Malu karthick Balaji ...	Music

9. Test report summary

The screenshot shows the Azure DevOps interface for work items. The left sidebar includes 'Overview', 'Boards', 'Work items' (selected), 'Backlogs', 'Sprints', 'Queries', 'Delivery Plans', 'Analytics views', 'Repos', 'Pipelines', 'Test Plans', 'Artifacts', and 'Project settings'. The main content area shows a work item for 'BUG 203: BG 01 - Countries Drop down Not Available on the page'. The work item details include:

- Title:** BUG 203
- Assignee:** rajesh prabhu
- Comments:** 0
- Tags:** Add Tag
- State:** New
- Reason:** New
- Iteration:** News Feed App
- Repro Step:**
 - Step no.: 1. Result: Passed Title: Open Chrome Browser Expected Result: Browser should open in a new tab
 - Step no.: 2. Result: Passed Title: Paste the URL (<https://127.0.0.1/new.html>) Expected Result: App should load with new articles
 - Step no.: 3. Result: Failed Title: System should show a dropdown with list of countries Produce Report
- Planning:**
 - Resolved Reason: Active
 - Story Points: 1
 - Priority: 2
 - Severity: 3 - Medium
 - Activity: 1
- Deployment:** To track releases associated with this work item, go to [Releases](#) and turn on deployment status reporting for Boards in your pipeline's Options menu. Learn more about deployment status reporting.
- Development:** Add link. Link an Azure Repos commit, pull request or branch to see the status of your development. You can also create a branch to get started.
- Effort (Hours):** Original Estimate: 1
- Related Work:** 0

- Assigning bug to the developer and changing state

Bug Detail:

Title: 92 TB01 - Playlist loading spinner keeps spinning indefinitely on poor network

Test Step 1: Step no. 1 Result: Failed. Description: Disconnect from internet. Expected Result: Network is offline.

Test Step 2: Step no. 2 Result: Failed. Description: Comments: Page Not loading. Navigate to "My Playlists". Expected Result: Error message "Unable to load playlists" is shown.

Test Configuration: Windows 10

Planning: Resolved Reason: BUG 92*, Story Points: 1, Priority: 2, Severity: 3 - Medium, Activity: Bug.

Deployment: To track releases associated with this work item, go to Releases and turn on deployment status reporting for Boards in your pipeline's Options menu. Learn more about deployment status reporting.

Development: Add link: Link an Azure Repos commit, pull request or branch to see the status of your development. You can also create a branch to get started.

Related Work: Add an existing work item as a parent: 77 TC06 - Playlist Loading Failure.

System Info: Tested By: KARTHICK S, Updated: 10-04-2025, Design.

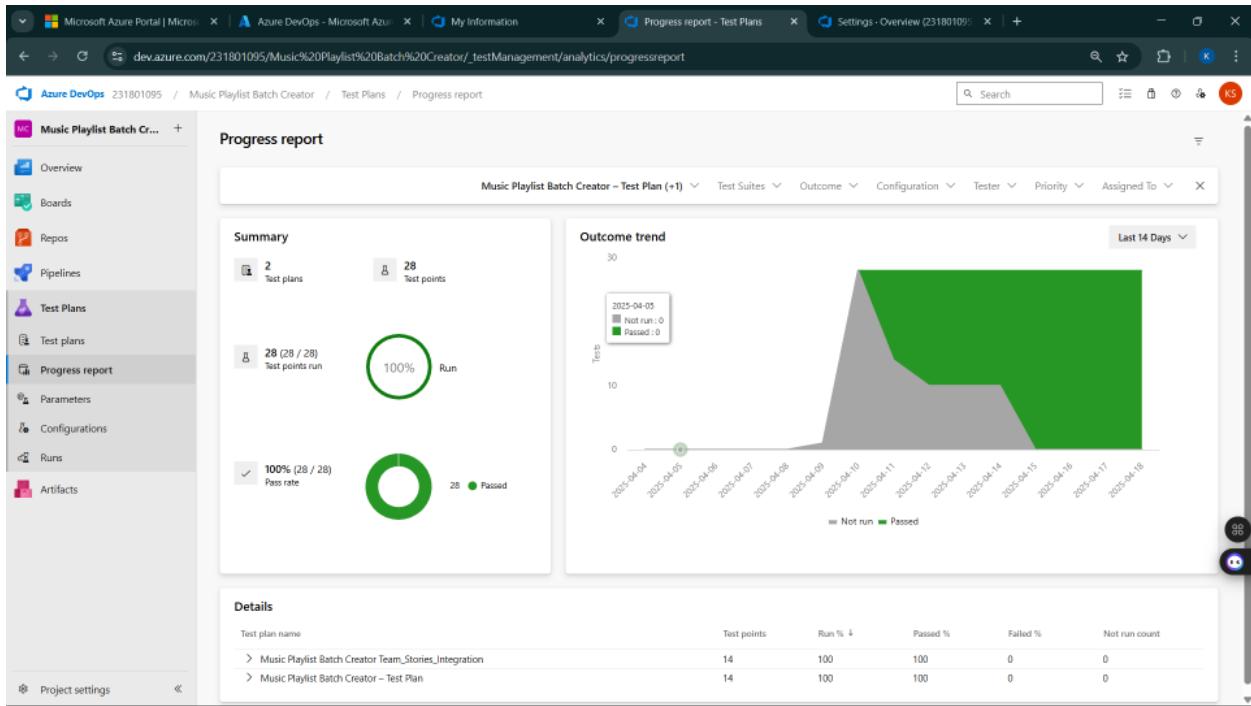

10. Progress report

Progress report

Summary: 1 test plan, 14 test points, 14 (14 / 14) Test points run, 100% Run, 100% (14 / 14) Pass ratio, 14 Passed.

Outcome trend: Last 14 Days. The chart shows a sharp increase in passed tests starting around April 10th.

Test plan name	Test points	Run %	Passed %	Failed %	Not run count
Music Playlist Batch Creator - Test Plan	14	100	100	0	0
T501 - User Login	4	100	100	0	0
T502 - View Playlists	2	100	100	0	0
T503 - Real-Time Metadata	2	100	100	0	0
T504 - Playlist Editing	4	100	100	0	0
T505 - Smart Playlist Creation	2	100	100	0	0

12. View the new test case template

The screenshot shows the Azure DevOps Settings - Process page. The URL in the browser is dev.azure.com/231801095/_settings/process?type-id=231801095Agile.TestCase&process-name=231801095%20Agile&_a=layout. The left sidebar is titled "Organization Settings" and lists various sections: General, Security, Boards, Process (which is selected), Pipelines, and Agent pools. The main content area shows the "All processes > 231801095 Agile > Test Case" configuration. A "Layout" tab is selected. Under the "Fields" section, there is a table with one row. The first column is labeled "Steps" and contains the description "Text (multiple lines)". The second column is labeled "Custom" and contains the "Type" "Text (single line)". To the right of the table, there is a vertical scroll bar and a button labeled "Add a field ...".

Result:

The test plans and test cases for the user stories is created in Azure DevOps with Happy Path and Error Path

EXP NO: 9	LOAD TESTING AND PIPELINES
-----------	-----------------------------------

LOAD TESTING AND PIPELINES

Aim:

To create an Azure Load Testing resource and run a load test to evaluate the performance of a target endpoint and to create and demonstrate an Azure DevOps pipeline for automating application builds, tests, and deployment.

Load Testing

Azure Load Testing:

Azure Load Testing allows you to simulate high traffic and stress tests for your web applications and APIs to understand how they perform under load. It helps identify performance bottlenecks, scalability issues, and optimize resource usage before deployment.

Steps to Create an Azure Load Testing Resource:

Before you run your first test, you need to create the Azure Load Testing resource:

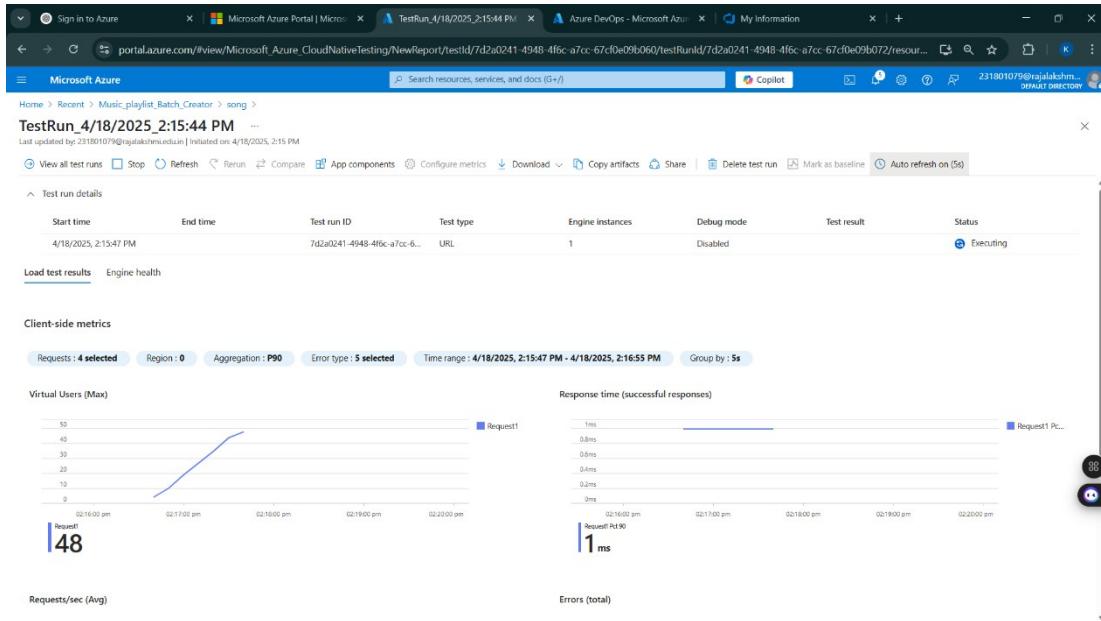

1. Sign in to Azure Portal
Go to <https://portal.azure.com> and log in.
2. Create the Resource
 - o Go to *Create a resource* → Search for “Azure Load Testing”.
 - o Select Azure Load Testing and click Create.
3. Fill in the Configuration Details
 - o *Subscription*: Choose your Azure subscription.
 - o *Resource Group*: Create new or select an existing one.
 - o *Name*: Provide a unique name (no special characters).
 - o *Location*: Choose the region for hosting the resource.
4. (Optional) Configure tags for categorization and billing.
5. Click Review + Create, then Create.
6. Once deployment is complete, click Go to resource.

Steps to Create and Run a Load Test:

Once your resource is ready:

1. Go to your Azure Load Testing resource and click Add HTTP requests > Create.
2. Basics Tab
 - o *Test Name*: Provide a unique name.
 - o *Description*: (Optional) Add test purpose.
 - o *Run After Creation*: Keep checked.
3. Load Settings
 - o *Test URL*: Enter the target endpoint (e.g., <https://yourapi.com/products>).
4. Click Review + Create → Create to start the test.

Load Testing

Pipelines

Description:

This experiment demonstrates how to connect a GitHub-hosted Flask-based music recommendation project with Azure DevOps. The pipeline will automatically install dependencies, run basic tests, and publish artifacts. This ensures that every commit triggers checks for reliability and smooth deployment.

Steps:

1. Connect GitHub to Azure DevOps:
 - o In Azure DevOps, create a new project.
 - o Create a pipeline and select GitHub as the source.
 - o Authorize access to your GitHub repository, ensuring that Azure DevOps can pull the repository for your pipeline.
2. Create `azure-pipelines.yml` in Your Repo Root:
 - o In your GitHub repository, create a new file called `azure-pipelines.yml` in the root directory.
 - o Add the following basic pipeline configuration for Python and Flask:

yml Code

```
trigger:
  - main # Trigger pipeline when changes are pushed to the main branch

pool:
  vmImage: ubuntu-latest # Use a hosted Ubuntu agent

steps:
# Step 1: Checkout the code from GitHub
  - checkout: self

# Step 2: Set up Python environment
  - task: UsePythonVersion@0
    inputs:
      versionSpec: '3.x' # Use the latest Python 3.x version
      displayName: "Set up Python"

# Step 3: Install dependencies from the correct path
  - script: |
    python -m pip install --upgrade pip
    pip install -r project/requirements.txt # Adjusted path to requirements.txt
    displayName: "Install dependencies"

# Step 4: Run a simple Python script to check the environment
  - script: |
    python -c "print('♪♪ Hello from Music Playlist Batch Creator!')"
    displayName: "Run a Python script"
```

3. Pipeline Tasks Include:

- Setting up the Python environment using the UsePythonVersion task.
- Installing project dependencies from project/requirements.txt. Make sure the path to requirements.txt is correct (it is located under the project folder).
- Running a simple Python script to verify that Python is set up correctly and the pipeline works.

4. Run and Monitor Pipeline:

- Commit changes to the main branch of your repository to trigger the pipeline in Azure DevOps.
- Monitor the logs in the Azure DevOps portal to view logs, errors, or success messages and ensure everything runs smoothly.

Pipeline

The screenshot shows the Azure DevOps Pipeline page for a project named "Music Playlist Batch Creator". The pipeline run is identified as "#20250424.3 • Pipeline 2". The summary indicates that the run was manually triggered by "Karthick S" and is being retained as one of three recent runs by the main branch. The repository and version information shows "Music Playlist Batch Creator" at commit "main a87bd670". The time started and elapsed is "Just now" (24s). There are no work items or artifacts related to this run. The "Jobs" section lists a single job named "Job" which has completed successfully in 6s. The pipeline interface includes a sidebar with options like Overview, Boards, Repos, Pipelines, Environments, Releases, Library, Task groups, Deployment groups, Test Plans, and Artifacts.

Result:

Successfully created the Azure Load Testing resource and executed a load test to assess the performance of the specified endpoint and also demonstrated pipelines in azure devops.

GITHUB: PROJECT STRUCTURE & NAMING CONVENTIONS

Aim:

To provide a clear and organized view of the project's folder structure and file naming conventions, helping contributors and users easily understand, navigate, and extend the Music Playlist Batch Creator project.

GitHub Project Structure

Result:

The GitHub repository clearly displays the organized project structure and consistent naming conventions, making it easy for users and contributors to understand and navigate the codebase.
